

Example Index by Thornton Gale

The following index is from the book *Getting Started on Your Genealogy Website*, Lulu Press (2008), book: 469 pages, index: 2526 entries.

Index

A

-
- “About Us” (utilitarian web page)
 - *glossary*, 403
 - on the contact page, 346–47
 - file name mnemonic, 105–6
 - general content and use of, 79
 - abstraction. *See also* hyperlink model
 - of the internet by a website, 10–14
 - abstraction* (as a criteria for a multilayered structure)
 - *glossary*, 403
 - description of, 165–66
 - accept-reject test (of images)
 - to reduce the quantity of images, 375
 - account (at www.genealogyhosting.com). *see also* account manager (of www.genealogyhosting.com account)
 - hosting services, using to get added value from, 316–18
 - setting up, 93–94, 295–96
 - user name and password, 302
 - webmaster, as the responsibility of, 130–32
 - account manager (of www.genealogyhosting.com account). *see also* account (at www.genealogyhosting.com)
 - using to
 - “c-Site” copyright protection, purchasing, 308–9
 - domain names, registering, 297
 - e-mail account, specifying settings, 316–18, 336–37
 - family e-mail system, administering, 334
 - form-mailer setting up, 351–52
 - “Online File Folder” plan, purchasing, 309–13
 - private registrations of domain names, purchasing, 307–8
 - “Website Tonight” plan, purchasing, 303–4
 - action
 - simplification metaphor, as a criteria of, 180
 - action (HTML FORM). *see also* [gdform.cgi](#). *see also* [gdform.asp](#)
 - *glossary*, 403
 - HTML tag, 344–45
 - “mailto” action option, 349–50
 - of an MS Publisher contact page, 287–88
 - of an MS Word contact page, 262–63
 - specifying, 347–48
 - add-ons (browser)
 - *glossary*, 403
 - description of, 143
 - for
 - Adobe Acrobat PDFs, 110
 - Microsoft Excel, 109
 - Microsoft Word, 109, 143
 - special files of the genealogy website, 110
 - address book
 - and www.genealogyhosting.com e-mail account, 318
 - administration submodel (GENTECH data model), 229
 - Adobe Acrobat. *See also* PDF
 - low-cost alternatives to, 110, 140–41
 - PDFs and, 110, 140–41
 - to standardize contributions to the website, 141–42
 - ad-supported free website, 30–31, 94–95, 305, 307, 318–20
 - doesn’t send the right message, 30–31, 94–95, 320
 - okay on a genealogy workbench, 225–26
 - okay on a tickle site, 223–24
 - Adwords (Google). *See* Google
 - ancestors (genealogy website content). *See* people (genealogy website content)
 - announcements
 - of new versions (of a website), 128
 - using contact list to make, 354
 - army company
 - as example of *hierarchy* layering criteria, 160–61
 - ASP (Active Server Pages). *See also* CGI (Common Gateway Interface)
 - *glossary*, 403–4
 - [gdform.asp](#). *see* [gdform.asp](#)
 - HTML FORM action option, using in, 344–45
 - using in the form-mailer action, 350

ASSERTION – ASSERTION entity (GENTECH data model), 231
 ASSERTION entity (GENTECH data model), 230–31
 assumptions
 about customers (visitors to your website), 92–93
 “atoms” layer
 glossary, 404
 achieving reusability of by placing in subfolders, 118–19
 of any multilayered structure, 152
 building the three-layered structure from the bottom-up, 107
 multilayered structures, as a characteristic of, 152
 reusing, achieving with the hyperlink model, 191–93
 of a three-layered structure, 63, 69, 81–82, 107, 170
 of a three-layered structure, overview, 189
 Aunt Millie
 her folder on www.schmidt14.org, 117
 uploading files to the “public filing cabinet,” 113–14, 117
 www.schmidt14.org, her wants and needs from, 47–48
 author
 glossary, 404
 relinquishing responsibilities for the website when it is published, 397–99
 and responsibilities for the files of a website, 394–401
 responsibilities of, detailed list, 130
 responsibilities of, overview, 6

B

backup and restore, 398–99
 glossary, 404
 of the MS Publisher file, 273–74, 291
 of the MS Word website, 252, 267–68
 overview of, 103
 “Big-4,” “Big-8,” “Big-16”
 glossary, 404
 family history website, to limit scope of, 17, 199–200
 Margaret Schmidt’s genealogy progress, 1
 pedigree website, to limit scope of, 212–13
 biographies
 in the modern local history book, 3–4
 used on
 county history book, 3
 descendant website, 209–11
 local history website, 17, 203–5
 Margaret Schmidt’s website (www.schmidt14.org), 45, 51, 83, 86, 118–19
 www.mannigel.org (surname website), 196–99

black & white
 scanning, using for, 373
 versus grayscale, 366–67
 black box
 glossary, 404
 features, to help define website’s, 50–51
 success factors, to facilitate identifying website’s, 51–52
 vision of a website, to articulate, 41
 blog website, 305–7
 glossary, 404
 compared to online forum, 327–31
 description of, 330–31
 free blog website, overview of, 31
 free blog website, setting up, 330–31
 server specified by the domain name, 296–97
 used on a tickle website, 18–19, 222–23
 body of related information
 glossary, 405
 introduction to, 59–60
 multilayered structure, requirement for defining a, 59–62
 summary of, 149
 boilerplate
 glossary, 405
 book (“The Book”)
 glossary, 405
 Microsoft Publisher, creating in, 278, 292–93
 Microsoft Word, creating in, 242–43, 251, 268–70
 as traditional form of genealogy publishing, 2–3, 96, 241–42
 website authoring application, required to produce by, 96, 241–42
 bottom layer (of multilayered structure). *See also* middle layer (of multilayered structure); top layer (of multilayered structure)
 glossary, 405
 construction process, overview of, 107
 design, notes on, 81–82
 introduction to, 63
 overview of, 189
 used to understand the three perspectives of website design, 57–58
 bottom-up (build strategy), 106–8
 glossary, 405
 bottom-up form (of layering criteria), 164–69.
 See also layering criteria (of a multilayered Structure); top-down form (of layering criteria)
 glossary, 405–6
 example of, 156–57
 form of
 abstraction, 165–66
 emergence, 166–67
 planning, 168
 product, 168–69
 proof, 167
 synthesis, 164–65

- overview of, 154
 - browser add-ons. *See* add-ons (browser)
 - browsing. *See also* previous – next buttons
 - *glossary*, 406
 - a collection, 76–77
 - the information elements on a layer of a multilayered structure, 151
 - brute force
 - *glossary*, 406
 - using to compensate for MS Word, 243–44, 254
 - buckets (“filling in the buckets”)
 - collaboration on a website, use in, 21
 - local history website, as a project strategy of, 203
 - project management technique, introduction to as, 97–98
 - “stubs” as starting point for, 104, 257–58, 285
 - building the structure first
 - *glossary*, 406
 - build phase, 89–128
 - *glossary*, 406
 - construction process, overview of, 106–8
 - of the dream house, 36
 - final touches, 121–22
 - of a Microsoft Publisher genealogy website, 277–94
 - of a Microsoft Word genealogy website, 249–70
 - overview of, 38–39
 - process
 - build from the bottom-up, 106–8
 - build the “extra” features, 111–14
 - build the special files, 108–10
 - build the structure, 97–103
 - build the “stubs,” 104–6
 - final touches, 121–22
 - getting visitors to your website, 122–28
 - obtain hosting services, 93–95
 - select website authoring application, 95–97
 - “build your own” hosting plans. *See* hosting plans
 - buttons
 - standard genealogy web page contents use of, 71–72
- C**
-
- campaign (to get visitors to your website). *See also* visitors (attracting to your website)
 - *glossary*, 406
 - categories (of a multilayered structure)
 - *glossary*, 406
 - becoming layers of a multilayered structure, 146–48, 147–48, 174–75
 - information elements, classification from, 173–74
 - iterative definition of, 149, 176
 - used to create multilayered structure, 147–48
 - cause-effect* (as a criteria for a multilayered structure)
 - *glossary*, 406–7
 - description of, 161
 - CGI (Common Gateway Interface). *See also* ASP (Active Server Pages)
 - *glossary*, 407
 - gdform.cgi. *see also* gdform.cgi
 - HTML FORM action option, using in, 344–45
 - Microsoft Word, example of in, 344–45
 - using in the form-mailer action, 351
 - change control. *See also* change cycle
 - *glossary*, 407
 - to minimize disruption to the visitors of the website, 39, 397–99
 - change cycle
 - of files (on the genealogy website), 394
 - of a genealogy website, 394–401
 - CHARACTERISTIC entity (GENTECH data model), 232
 - “chunks” (division of printed web page)
 - *glossary*, 407
 - diagram of, 380
 - and DPI in images, 379–81
 - Church of Norway
 - as example of *conclusion* layering criteria, 162–63
 - CITATION-PART entity (GENTECH data model), 230
 - citations
 - *glossary*, 407
 - used in surname research, 194–99
 - classic website, 178–82. *See also* simplification (organizational metaphor)
 - *glossary*, 407
 - classification criteria (of categories). *See also* categories (of a multilayered structure)
 - *glossary*, 407
 - client (computer)
 - *glossary*, 407–8
 - collaboration
 - design consideration of
 - family history website, 199
 - local genealogy website, 206
 - local history website, 203
 - elusive ancestor website, to encourage use of, 218
 - as a reason for a genealogy website, 21
 - collection (information structure), 76–78
 - *glossary*, 408
 - multilayered structure, typical of the layers of, 81–82
 - and reusability of “atoms,” 119, 191–93
 - collection (of information)
 - as a reason for a genealogy website, 22–23
 - collection home page
 - *glossary*, 408

- description of, 76–77
- diagram of, 76
- and folder home page, 75–77
- used on
 - descendant website, 210–11
 - elusive ancestor website, 217–18
 - family history website, 200–201
 - local genealogy website, 207–8
 - local history website, 204–5
 - noteworthy ancestor website, 220
 - pedigree website, 214–15
 - surname website, 197–98
- collection member page
 - *glossary*, 408
 - description of, 77–78
 - diagram of, 78
 - used on
 - descendant website, 210–11
 - elusive ancestor website, 217–18
 - family history website, 200–201
 - local genealogy website, 207–8
 - local history website, 204–5
 - noteworthy ancestor website, 220
 - pedigree website, 214–15
 - surname website, 197–98
- collection website, 184–86. *See also* index metaphor
 - diagram of, 186
- combination websites, 226
 - *glossary*, 408
 - diagram of, 226
- community center design
 - as example of *design* layering criteria, 164
- comparing two houses
 - as example of *abstraction* layering criteria, 165–66
- compression (of images), 381–82
 - *glossary*, 408
 - example of, 382–84
 - in the image collection, 376–77
 - of JPEG format, 361, 371–72
 - preparation for the website, 377–78
 - of TIFF format, 360–61
- computer platform testing, 401
 - *glossary*, 408
- computer screen. *See* screen (computer)
- conclusion* (as a criteria for a multilayered structure)
 - *glossary*, 408
 - description of, 162
- conclusional submodel (GENTECH data model), 230–32
- conclusions layer
 - of generic genealogy website, 68
 - GENTECH data model, mapping to, 237
- confederation of files
 - *glossary*, 408
 - websites as, 4–5, 129
- contact list. *See also* FORM (HTML)
 - *glossary*, 408–9
 - building, how to, 352–54
 - introduction to, 14–15
 - permission to put visitor on, obtaining, 347, 353
- contact page, 345–54
 - *glossary*, 409
 - action, how to specify, 347–48
 - contact list, building a, 352–54
 - designing, 345–47
 - example of, 345
 - introduction to, 14–15
 - Microsoft Publisher, installing with, 278, 286–89
 - Microsoft Word, installing with, 251, 259–65
 - overview of, 112
 - permission (to put visitor on the contact list), obtaining, 347, 353
 - as a utilitarian web page, 79
 - “Website Tonight,” installing with, 303, 324–25
- content (of a genealogy web page), 72
 - *glossary*, 409
 - reusability of. *See* reusability (of website content)
- control (of information)
 - as a reason for a genealogy website, 23
- control panel. *see also* account manager (of www.genealogyhosting.com account)
 - of www.freefind.com account, 252–53, 281
- conversion
 - from TIFF to JPEG, 109–10, 367–69, 382–84
- copyright
 - “c-Site” copyright protection (www.genealogyhosting.com service), 308–9
 - NGS recommendation for, 72–73
 - putting on the website, 72–73, 308–9
 - urging not to copyright your images, 378
 - warning on copyrighted images, 375
- county history book, 3–4. *See also* local history book
- cousins
 - locating with a website, 24–25
 - source of critical genealogical information, 24–25, 39, 122
- criteria for defining layers (of a multilayered structure), 158–69
 - abstraction* criteria, 165–66
 - cause-effect* criteria, 161
 - conclusion* criteria, 162
 - decomposition* criteria, 158–59
 - design* criteria, 164
 - emergence* criteria, 166–67
 - explanation* criteria, 159
 - harmony* criteria, 163
 - hierarchy* criteria, 160–61
 - planning* criteria, 168
 - product* criteria, 168–69
 - proof* criteria, 167

- regulation* criteria, 162–63
 - specification criteria, 160
 - synthesis* criteria, 164–65
 - cropping
 - editing images on the genealogical website, 377–78
 - “c-Site” copyright protection (www.genealogyhosting.com service), 308–9. *See also* copyright
 - *glossary*, 409
 - currency (of information)
 - as a reason for a genealogy website, 23
 - customer profile
 - *glossary*, 409
 - customers (visitors to a website)
 - *glossary*, 409
 - assumptions about, 92–93
 - disruption to, avoiding during publishing, 397–99
 - identifying, 43–45
 - technical profile of, 92–93
 - visitors as, 6–7
 - wants & needs of, 37, 43–50
 - of www.schmidt14.org, 44–50
- D**
-
- database (of genealogy software program). *See also* “mini – website”
 - *glossary*, 409–10
 - don’t duplicate information of on a genealogy website, 199, 216
 - exporting and putting on a website, 110–11
 - and “Family Home Page” (Family Tree Maker service), 111
 - HTML “mini – website,” converting to, 80, 110–11, 117–18
 - hyperlink to, 110–11
 - top menu bar, access to via, 80
 - data model. *See* GENTECH Genealogical Data Model
 - *glossary*, 409
 - date
 - in EVENT entity in GENTECH Genealogical Data Model, 232
 - of update of a web page in footer, 78
 - decomposition* (as a criteria for a multilayered structure)
 - *glossary*, 410
 - description of, 158–59
 - introduction to, 61–62
 - top-down form, as example of, 153
 - default.htm
 - *glossary*, 410
 - as alternative to index.htm, 138–39
 - deleting files. *See also* maintaining the genealogy website
 - files on the website, 393
 - deleting images
 - when copying to the image collection, 376–77
 - when in the temp storage, 367–69, 375
 - “Deluxe” plan (www.genealogyhosting.com service)
 - and sharing a web hosting plan (mini-web hosting service), 337–40
 - dependence – independence (as a characteristic of multilayered structures)
 - *glossary*, 410
 - description of, 151–52
 - diagram of, 152
 - descendant website, 209–12
 - *glossary*, 410
 - comments about, 212
 - as a design approach, 65
 - discussion of, 209
 - four-layered structure of, 209–12
 - generic genealogy website, comparison with, 240
 - hyperlink model of, 210–11
 - overview of, 17–18
 - purpose of, 209
 - reusing content, opportunities for, 211–12
 - DESCRIPTION (HTML tag)
 - *glossary*, 410
 - description, 125
 - design* (as a criteria for a multilayered structure)
 - *glossary*, 410
 - description of, 164
 - design approaches (to structuring the information elements), 58–69
 - *glossary*, 410
 - designing the layers, notes on, 81–82
 - recommended approaches
 - generic genealogy website, 67–69
 - multilayered structure, 59–62
 - organizational metaphors, 66–67
 - three-layered website, 62–63
 - website types, using one of them, 64–65
 - rules of good website design, 70
 - design phase, 53–88
 - *glossary*, 410
 - of dream house, 35
 - general rules of good website design, 70
 - introduction to, 53
 - overview of, 37–38
 - process
 - design the web page contents, 69–81
 - structure the information content, 54–69
 - www.schmidt14.org information structure, 83–88
 - dialog (with the website)
 - wants and needs, thinking in terms of to define, 44
 - diary (ancestor’s)
 - as example of *conclusions* layering criteria, 162

- digital cameras. *See also* images (on a genealogy website)
 - JPEG format to record photos, use of, 361
 - JPEG Settings, 373–74
 - scanning, versus, 373–74
 - as a source of images for a genealogy website, 373–74
 - Windows Explorer, retrieving images from using, 374
 - digital image. *See also* images (of a genealogy website)
 - *glossary*, 411
 - digital negative storage
 - *glossary*, 411
 - historical document in, example of, 382–84
 - and the image life cycle, 367–69
 - organization of images in, 375–76
 - direction (of relation)
 - *glossary*, 411
 - description of, 155
 - example of, 156–57
 - discipline
 - *glossary*, 411
 - DOC (Microsoft Word file)
 - *glossary*, 411
 - browser add-on for, 109, 143
 - as a file format of a website, 109, 141–42
 - HTML as alternative file format, 97, 244
 - searchable by free search engines, 356
 - documents (genealogy website content)
 - *glossary*, 411
 - collection, guidelines as, 77
 - file name mnemonics of, 105–6
 - generic genealogy website, as a layer of, 68–69
 - reusability of. *See* reusability (of website content)
 - used on
 - descendant website, 209–12
 - elusive ancestor website, 217–18
 - family history website, 200–202
 - local genealogy website, 206–8
 - noteworthy ancestor website, 219–21
 - pedigree website, 213–16
 - www.schmidt14.org, 115–19
 - domain name, 296–300
 - *glossary*, 411–12
 - alternative, finding an, 297–300
 - blog website, using to implement, 330–31
 - forwarding to another website (e.g., a free website). *See* forwarding (domain)
 - as marketing collateral, 26
 - monopolizing, responsibilities for, 26
 - obtaining, 26, 94
 - overview of, 25–29
 - as permanent e-mail address, 28–29, 94
 - private registration of, 307–8
 - purpose of, 26
 - registering multiple domain names, 338
 - registering, overview of, 26, 297
 - and sharing a hosting plan, 337–40
 - as a website requirement, 7–8
 - “Downloads” (utilitarian web page). *See also* downloads folder
 - *glossary*, 412
 - general content and use of, 80
 - downloads folder. *See also* “Downloads” (utilitarian web page)
 - *glossary*, 412
 - file name mnemonic of, 105–6
 - and GEDCOM files, 108
 - and the special files of the genealogy website, 108–10
